

JEYACHANDRAN SACHIN

Undergraduate · BSc (Hons) Information Technology · Data Science
+94 765588521 | sachinjeeyachandran@gmail.com | Jaffna, Sri Lanka | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Motivated Data Science undergraduate pursuing a BSc (Hons) in Information Technology at SLIIT. Skilled in Python, SQL, Java, Machine Learning, Data Analysis, Data Visualization, and Database Management. Experienced in academic projects involving IoT, software development, and predictive analytics. Seeking a Data Science, Data Analyst, Machine Learning, or Software Engineering internship.

EDUCATION

BSc (Hons) in Information Technology | 2024 – Present

Sri Lanka Institute of Information Technology (SLIIT) – Faculty of Computing – Specialization in Data Science

JOB EXPERIENCE

Seeking internship opportunities in Data Science, Data Analytics, or Software Development to apply and enhance analytical, problem-solving, and programming skills through real-world projects and industry experience.

TECHNICAL SKILLS

Programming Languages:

Python, Java, C

Data Science & Analytics:

Machine Learning, Data Analysis, Data Visualization

Web Technologies:

MERN Stack (MongoDB, Express.js, React.js, Node.js), Django, Next.js

Databases:

MongoDB, MySQL, Microsoft SQL Server (MS SQL)

Libraries & Tools:

Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Version Control:

Git, GitHub

SOFT SKILLS

- Analytical Thinking
 - Problem-Solving
 - Communication & Data Storytelling
 - Teamwork & Collaboration
 - Time Management
 - Continuous Learning
-

LANGUAGES

- English – Intermediate
 - Tamil – Native
-

ACADEMIC PROJECTS

1. Smart Walking Stick for Visually Impaired (Nov 2024 – Jan 2025)

Developed an IoT-based assistive device to help visually impaired individuals navigate safely. The system detects nearby obstacles using ultrasonic sensors and alerts users through vibration and audio feedback.

- Enabled real-time obstacle detection to enhance mobility and safety.
- Integrated hardware components with embedded programming for reliable performance.
- Developed a low-cost, user-friendly assistive technology solution.

Technologies: Arduino, Ultrasonic Sensors, Buzzer, Vibration Motor, Embedded C.

2. Vehicle Parking Management System (Mar 2025 – May 2025)

Built a software system to manage parking slot allocation and efficiently track vehicle entry and exit. The system improves parking space utilization and reduces manual tracking errors.

- Implemented an object-oriented design to create scalable and maintainable code.
- Established features for slot allocation, availability tracking, and reporting.
- Utilized file handling and/or a database for persistent data storage.

Technologies: Java, OOP, File Handling / Database

3. Event Photography Management System (Aug 2025 – Oct 2025)

Created a system to organize, store, and manage large collections of event photographs, enabling efficient categorization and retrieval.

- Maintained a database structure for storing and managing image metadata.
- Implemented search and filtering features for quick access to photographs.
- Enhanced the user experience through structured data organization.

Technologies: Java, Web Technologies, MySQL.

4. AI-Based Visa Recommendation System (Aug 2025 – Oct 2025)

Designed a machine learning system that analyzes user profiles and recommends suitable visa options based on predefined criteria.

- Applied data preprocessing and feature selection techniques.
- Built and evaluated machine learning models to provide accurate recommendations.
- Improved decision-making through data-driven insights.

Technologies: Python, Pandas, Scikit-learn.

CERTIFICATIONS

- **AI Research Poster Exhibition – Participant | SLIIT Northern Uni, Think AI Expo 2025**

Presented an AI research project titled "**AI-Based Visa Recommendation System**" at the AI Research Poster Exhibition 2025.

Received a Certificate of Participation from SLIIT Northern Uni, signed by the Vice Chancellor and Dean Academic/CEO.
